Keynote Speaker

KRIS KAULL, NRP, FP-C, CCEMT-P

“Mastering the Mayhem: Wit, Wisdom and the Will for Excellence in EMS”

Kris Kaull, B.S., NRP, CCEMT-P, FP-C, has driven innovation and positive change in EMS for nearly 30 years. He combined his love for EMS and technology, developing new information sources and platforms that improve patient care and EMS operations.

Today, Kaull is regarded as a leading expert in EMS, healthcare, online media and technology. After beginning his career as a firefighter and EMT, Kaull started paramedic.com and co-founded EMS1.com, which is the leading online paramedic resource today. Kaull then transitioned to his current role as Chief Growth Officer at Pulsara, a healthcare communications company. He’s worked as a firefighter captain, paramedic, ambulance service director and still practices as a critical care flight paramedic covering rural Montana and Yellowstone National Park.

Kris is a national speaker, writer and entrepreneur. His humorous and honest conversation will dig into the raw truth of the EMS profession by weaving together personal experiences of struggle and resilience. We explore how embracing the chaos, understanding the risk of flawed decision-making, and fostering a culture of compassion and mentorship can lead to unparalleled excellence in emergency services.

As we celebrate the 50th year of EMS Week, we’ll draw on insights from diverse fields, delve into the psychological and environmental factors that can lead to critical mistakes, and examine the dualities of stupidity and brilliance, failure and success, chaos and control, and vulnerability into victory. This isn’t just about navigating the unpredictability of EMS; it’s a blueprint for thriving in it—both on the ambulance and off duty.
